## VAPE GROUP RECIPES

---

---

### Short Recipes

- 3% bubblegum and .5% clyrocool awesome and easy mix. And very nice i have heard of someone else on the group adding spearmint as well with bubblegum. Got myself some but havent mixed yet. If i remember correctly he said spearmint at 1.5% or something like that.
- I do 2.5% bubblegum and 2.5% spearmint. Played with the %'s and I always come back to that
- 3% cherry, 4% cola, 1% clyrocool (these are just based on the defaults given recently) + 3% extra pg for the 100% ratio, and you should have you some cherry cola
- I will start with a cookies and cream, malva pudding and marshmallow
  - C&C 2.5%, malva, 1.25%, marshmallow 0.5%
- It's Mc innoys tropical Punch and it works by itself at 3.3%, steep 2 to 4 weeks
- Any recommendations for a decent coffee cake using Clyro flavours?
  - Espresso2% malva1% caramel 0.5%
  - Espresso3% hazelnut 2% cream2% and orange 0.5%.70/30 at 3mg nic.
- i used 3%cocoa and 3% mint just made a 10ml shake and vaped it and it taste good,will be better after steeping couple of days
- 1.5% tropical fruit. 1% cocopine. 0.8%lime.
- Vaping the spearmint bubblegum I made last. Delicious. Spearmint 2.5%, bubblegum 2.5%, clyrocool 0.5%.
- Berries at 3% + clyrocool 5-10 drops in 30ml is pretty good
- Most of the fruits are good stand alones accept the Strawberry, use that as a Base, creamsoda, fireball, banana (sweets), bubblegum (wicks), Turkish Delight if you like that type of sweet, vanilla toffee, milk tart
- Just to add to this. Litchi, Starwberry Milk and Passion Fruit are very good as a single flavour. I also had a watermelon as a single flavour but it wasnt an all day vape though.
- A nice smooth coffee with a little kick, in which case I would go creamy coffee @ 2% and espresso coffee at 0.5 - 1% and maybe add a little cream also @ 0.5 - 1% and for some sugary goodness add brown sugar @ 1% and clyrosweet @ 0.25 - 0.5% (brown sugar over

## VAPE GROUP RECIPES

and above sweetness adds a little authenticity to the coffee). If you want a stronger coffee kick then use the above but increase the coffee espresso, but I would not increase it past 1.5, max 2%. Then lastly, remember that coffee falls into the category of a looong ...

- Banana and custard can go down very well. As base I would do custard @ about 3 - 3.5% and banana @ 0.5%. Then to add to it depends on what you want to make. Additions to it that you can consider (not all together though) are Amarula @ 0.5% / Butterscotch @ 0.5% (you can maybe look at 1.5% but then drop the custard lower) / Condensed Milk @ 1% / Peanut Butter (would be an interesting mix but can work) @ 0.5% / Creme Brulee @ 1% (remember, Creme Brulee is basically custard but with a 'burned' brown sugar coating, maybe add this and Amarula if you're feeling adventurous, it sounds nice in my mind 😊 )
- Hazelnut does go very well with coffee flavours, but don't overdo it as you want a coffee flavour with some Hazelnut. I would say add about 0.34 - 0.5% and you can always add more as it is a almost instant flavour requiring not too much extra steep time once added (if your mix has steeped and you want to add more, throw in a drop or two extra and let it stand about another 2 days).
- Bubblegum n spearmint combo
  - 2.5% each is how I mix it. Its my daily vape. Love it. I also add 0.5% clyrocool
- marshmallow @ 5% and caramel popcorn @ 1.5
- 2% cherry 3% tabaco
- 2% litchi 1.5% dragon 1.5% kiwi 2 drops per 10ml clyrocool
- 2.5 mango, 2.5 pineapple and 0.5 clyrocool. Was delicious. But I was chasing a pineapple vape, and the mango is very dominant. So I lowered mango to 2. Might even go a bit lower on mango in the next one. But a mango vape is seriously good if you like fruits.
- I do a 2.5 Bubblegum, 2.5 spearmint and it lekkasauce
- 2.5%tobacco, 1.5%vanilla 0.2% honey...
- 3%custard 1.5% ice cream 0.3% raspberry
- Grape 4%, Strawberry 1%, Kiwi 1% 1 drop sweetner, 1 drop cool
- Strawberry @ 2.5%, Kiwi @ 3%, Grape for sweetness @ 0.5%
- Try 2% blueberry and 2.5% apple with 2 drops clyrocool oer 100ml.
- Grape @ 4% , Strawberry @1%, Kiwi@ 1%, Clyro sweet @0.2, Mint @ 0.2

## VAPE GROUP RECIPES

- 
- Espresso coffee 2% ice cream 1% clyrocool 0.5. Wife loves it and her all day vape.
  - Blueberry 2.5%, Candyfloss 3 %, Berries 1%, Was not bad
  - 1% iron brew and 0.5% cola mix - (4 weeks steep) 👍 🍷 🗨
  - Cranberry 3%, Apple 2%, Cotton candy 1.5%, Breath for an hour after warm bath and steep for a week.
  - Mango Lime - Mango @3%, Lime @0.4% and then maybe add a bit of Cly Sweet if you wish... Steep for a week or 2 and you're good to go... I love it..
  - I made a mango and lime before but not ice cream..Mango 3%, Lime 0.5%
    - Or 2% ice cream and 3 drops clycool
  - 2.5% Clyro bubblegum, 2.5% spearmint and you have a winner
  - Mango and pineapple is great. About 2.5% each. Mango is more dominant than pineapple though so change depending on what you want. So maybe 3% pineapple, 2% mango for example
  - Cream soda at around 3% with cotton candy at around 0.5%, or marshmallow at around 0.5% too
  - I made a grape ice a few weeks back. Used 3.5% grape and 1.5% clyrocool. I like intense cool though. Maybe stick to 1%. Its one of the juices that stays in my daily rotation.
  - I did grape at 3% Clyro cool at 0.5% and quite liked it. The grape profile reminds me of liquifruit/ceres grape juice
  - i would do 2% caramel, 1% chocolate and 1% apple
  - 2.5% Custard, 1% Ice Cream, 2 drops cinnamon, I have not mixed this up myself, but I am sure it will be a nice combo
  - 3% lemon 2% lime and 2 drops sweetener
  - Im going to try it at 3% with 1% ice cream and 0.2% sweetener.
  - So 3% ice cream and 1%blackberry?
  - 3% cola 0.5% Cherry and 0.2% lime.
  - I did pistachio 2%, icecream 1.5% and honey 0.5%. Still waiting on the steep (only 2 weeks so far)
  - Bubblegum on its own at Bubblegum @ 5%, Spearmint @ 1% (maybe 1.5%)
  - Bubblegum @ 5%, Grape @ 2%

## VAPE GROUP RECIPES

- Licorice @ 1.5%, Menthol @ 0.5%
- The clyro recipe, 2.5% bubblegum, 2.5% spearmint, it's a top combo
- About 2% Grape and depending how cool you want it, between 0.5% - 1.5% clyrocool - note that 1.5% may shatter your teeth it's so cold
- Strawberries & Cream 4%, Shortbread 2%, Clyrosweet 0.5%
- Try this. So I use premix 3mg. 2% Mango, 2% lime, 1% Sweetner, 0.5% cool, 2% enhancer, 2.5% pg top up. Shake till your arm breaks and steep for 2 weeks, you can test after a week. Random shakes during the two weeks and 1 hour breathing
- Peach : 2.5 - 3%, Strawberries and cream : 2%
- Something to try, I love it. 1.9% bubblegum, 3% ice cream, 3% Condensed Milk, 0.5% clyrocool, 1% clyrosweet. Enjoy
- 6% Strawberry, 3% lichee, 1% cool
- 3% blueberry, 1% apple sour, 1.5% apple
- 4.5% Mango, 4% Pineapple, 1% Menthol
- 0.75% apple, 1% cranberry
- I used clyro coffee at 3.5% along with ice cream at 1.5%. Steeped for about 6 weeks. It was amazing, tasted like creamy coffee.
- I would try 3% Mango and 2% pineapple with couple drops cooler
- You could try lime 1%, condensed milk 1%, ice cream 2%, Clyro sweet 1%
- I made an espresso cream Flav 30ml and used 5% espresso 3% cream ratio.
- Cappella Sweet Strawberry - 3.5%, Cly Strawberry - 1%, Milk 0.5%, From there you can probably add in some clyrocool about 0.5% - 1%, depending on how cold you want it
- Mango 2.5%, pineapple 2.5%, enhance 1%. Shake and vape
- Rum 1% and amaretto 2.7%
- Lemon cream 2%, doughnut 1.5% and condensed milk 0.5%
- White chocolate 2.5% and doughnut 2%
- Cherry 2% white chocolate 2% mint 0.2%
- I will do passion fruit at 1% and mango at 3% mango not very strong it's actually mild
- 1% lime, 2% milk, 3% ice-cream
- 3% tobacco + 2% cherry, can add .5 milk to smooth it out

## VAPE GROUP RECIPES

- 
- 2% cly strawberry, 3% cappella strawberry sweet and clyrocool to where it's cold enough for you
  - 0.5 choc, 1 mint, 1.5 bevarian

Do not have a recipe for white chocolate as I usually use the Saveurs de Provance Chocolate. But seeing as white chocolate will be quite sweet I think the following may work:

Plain chocolate:

3% White chocolate

1% Ice Cream

0.5% Clyrosweet

(optional) 1% CAP Jelly Candy

### **79. Strawberry Chocolate:**

3% White chocolate

2% Strawberries and Cream

0.5% Clyrosweet

### **80. Caramel Chocolate**

3% White chocolate

1% Dulce de Leche

0.5% Clyrosweet

81. \_\_\_\_\_

Remember, a recipe does not need to be very complicated to be nice, so 2-3 ingredients can work nicely

3% Cinnamon Fireball

0.75% Bubblegum

1% Clyrosweet

Makes a nice cinnamon fireball gumball flavour

82. \_\_\_\_\_

Rough estimates based on my findings so far but for Milo you'd probably need

Cacao - 2.3%

Milk chocolate - 0.5%

Malt - 1-1.5%

It's basic chocolate with malt to give it that heavy Milo taste.

83. \_\_\_\_\_

Bubblegum milkshake is simple

Bubblegum - 0.5 - 1%

Milk - 0.4%

### **84. Bubblegum Milkshake:**

CLY Bubblegum @ 2%

CAP Vanilla Bean Ice Cream @ 4% (also sold by CLY)

CLY Sweet Cream @ 1%

Clyrosweet @ 1%
